FBI IAFIS Appendix F Certification

The certification provides assurance to users that RealScan-G10 meets or exceeds FBI interoperability standards and will work with the Integrated Automated Fingerprint Information System (IAFIS). It ensures that the images used are high quality and supports all phases of identification for fingerprint experts and the IAFIS. Appendix F has stringent image quality conditions, focusing on the human fingerprint comparison and facilitating large scale machine one- to-many matching operation.

Advanced Rolled Image Construction Technology

RealScan-G10 features Advanced Rolled Image Construction technology using Xperix's unique slip detection algorithm for constructing rolled fingerprint images. With ARIC technology, RealScan-G10 performs over 15 fps frame rate in roll capturing which ensures highest image quality and lower error rate in capturing sequences.

Extra Wide Platen for Easier Capturing

Wide & solid, the RealScan-G10's 3.5 inch platen is the largest size in its class and ensures easier capturing when placing hands. The solid & scratch-free surface makes it durable for many kinds of stains & damages.

Rugged IP65 Dust & Waterproof Structure

RealScan-G10's body structure has been comprehensively sealed against invasive moisture, dust and liquid. Featuring superb IP65 rated protection through meticulous sealing, combined with extra protective engineering, ensures faultless operation even under harsh conditions.

Powerful Internal DSP

RealScan-G10 is equipped with powerful CPU which enables high-speed image processing in capturing, storing, processing and transferring fingerprint data. With the CPU, Xperix's unique Image Pre-Processing technique results more frame rates in capturing and richer pixel throughput hence produces better image quality.
