Asset and Inventory Tracking Solution

Track, Locate and Manage Your Assets

The 3M™ Asset and Inventory Tracking System is an ideal way to streamline your business operations. With features and functions that help you manage critical inventory and track valuable assets, you have the tools you need to enhance visibility to the areas that need it most.

Applying Asset and Inventory Tracking at Your Company

Track and Manage Assets

The 3M Asset and Inventory Tracking System is key to effectively managing the most valuable assets at your company—including IT components, calibrated equipment, and consigned inventory. Simply tag your assets with RFID or a barcode, then attach important files to the asset record. A centrally located reader allows you to assign assets to particular individuals, while a mobile handheld reader audits assets to help ensure accuracy in your reports.

Manage Complex Workflows

Managing complex workflows throughout your organization is as simple as tagging your assets with RFID or a barcode to create an asset record. You can then read the location of the asset with a fixed or mobile reader, and generate on-demand reports to analyze usage.

Manage Critical Inventory

The 3M Asset and Inventory Tracking System can bring visibility to the location and availability of the critical inventory or assets your business depends on—even if they are in multiple locations, in different facilities.

Flexible.
Easy.
Secure.

3M Asset and Inventory Tracking System Uses

Check In/Check Out

Use the system to help manage incoming and outgoing assets instantly and effortlessly.

Search and Report

Use the built-in reports and views to help manage your assets and inventory.

Manage Critical Inventory

Take advantage of the inventory functions to help manage important components such as spare parts or critical raw materials.

Easily Track Asset Location

Place readers at key locations, to associate an asset with its current location.

Free Phone Support

Our phone support is available Monday through Friday from 7 a.m. to 6 p.m. CST. Call 1-800-944-3512.

Data Management Security

Your data is saved in a Tier III data center as defined by The Uptime Institute and is managed using policies and procedures modeled after ISO/IEC 17799:2005 and ISO/IEC 27002, international standards for information security and business continuity.

Setting Up Your System

1 Create your account at tracking.3m.com

2 Tag items with RFID or barcodes

3 Scan items

4 Monitor assets and inventory online

The 3M™ Asset and Inventory Tracking System Difference

3M Asset and Inventory Tracking System (AITS) offers all the components you need to track assets and inventory—packaged in one solution from a source you can trust.

Flexible Data Capture

The 3M Asset and Inventory Tracking System supports RFID and Barcode detection, to provide greater flexibility in handling your needs.

Mobile Asset Management

A commercial-grade wireless handheld device allows you to easily audit and track assets across your business.

Software Delivery

Your data is automatically backed up in a Tier III data center and is available to you anytime, anywhere—with no need to install and configure servers or purchase server licenses.

Barcode Printing

The system is compatible with the printer you already own, eliminating the need to purchase a specialty barcode printer.

Product Selection Guide

1. Select Your Software Package	2. Select Your Tagging Method	3. Select Your Hardware
<input type="checkbox"/> Basic 1 user / 200 assets <input type="checkbox"/> Professional 5 users / 1,000 assets <input type="checkbox"/> Enterprise 25 users / 3,000 assets <input type="checkbox"/> Unlimited unlimited users / unlimited assets	<input type="checkbox"/> RFID <input type="checkbox"/> Barcode	<input type="checkbox"/> Handheld RFID and Barcode Scanner <input type="checkbox"/> Small RFID Reader Pad <input type="checkbox"/> Large RFID Reader Pad <input type="checkbox"/> Barcode Reader
